Subject: DRAFT Ensuring Patient Access and Effective Drug Enforcement Act

To: Federal Government Affairs Committee

We have received the attached **draft** legislation on DEA prescription drug enforcement activity from Reps. Marino and Blackburn. When we met with their offices on hydrocodone, they mentioned their interest in addressing the broader prescription drug issue and this is the product of their work. This is a very early draft, as you will notice legislative counsel has additional questions within the document. Additionally, there is similar language to the draft legislation Senator Boxer has asked for us to review and support.

Marino's office indicated their goals are:

- 1) Clarifying existing authorities under the CSA and requiring escalation of enforcement under certain circumstances; and
- 2) Some sort of mandated continuing dialogue between industry and DEA.

We are still reviewing the draft internally but wanted to share this with you before the FGAC call tomorrow where we will begin preliminary discussion. Rep. Marino's office is very open to feedback and additional ideas.

Rep. Marino is on the House Judiciary Committee and Rep. Blackburn is on the Energy and Commerce Committee.

Thank you,

.....
